

Specialty Products **FAQ**

Part number 37985

Use for removing wheel studs

Q1: How far will the jaws open on this ball joint/tie rod separator?

A1: The maximum jaw opening is approximately 2 ½ inches when set at the widest configuration.

Q2: I have heard that the SPC #37985 Ball Joint Separator can be used to remove wheel studs from wheel hub assemblies. Is that true?

A2: Yes. The SPC 4 Way Separator is becoming the preferred way to remove wheel studs. The unique design will allow you to easily press out wheel studs up to 2.75 inches in length without damaging the hub or wheel bearing.
